Cover Letter

Object: Cover Letter for an internship in your company

Dear,

Your Company represents for me an important opportunity because your activity corresponds to my current training.

I am a French student. I am currently completing my first year of engineering studies at an IT engineering school "Cesi Exia" based in Arras in the North of France.

During my second year I completed an internship abroad for four months in an international company (beginning between September 26 and October 10).

I chose to do my internship in an English speaking country to improve my English skills and practice English. This is a computer internship which will enable me to do programming and IT project management.

My programming skills allow me to both integrate myself into a project in progress and do a project independently.

An internship in your structure will give me professional experience, knowledge in programming and management skills for a professional project.

You can contact me anytime on my cell phone or send me an email, I look forward to hearing from you.

Sincerely

MAROLLE Nicolas
